**Subject:** Technical Memos & NOI Review

Good day Hanh,

Please find attached three technical memos Shell discussed with EPA during our last meeting. Shell prepared and provides the following:

- Comparison of model results;
- Rationale on current max/min selection; and
- Toxicity testing overview.

Please give us a call or email should you or others have any questions on the content of the technical memos.

## NOIs

Shell understands that EPA will get back to us if you have any questions on the resubmitted NOI packages, but at the moment it looks like EPA is on schedule with what we discussed at our last meeting. EPA anticipates posting the NOIs on its website in early May for public awareness, but will not be requesting or taking public comment. Then, if all goes well with EPA's review of the NOIs Shell can anticipate authorization of the NOIs in early June. Feel free to give me a call or email if my understanding is inaccurate.

Sincerely,

Greg J. Horner
